

# IMDb Insights of Movie Analytics

Based on Rating

IMDb born: October 17, 1990

Founder: Col Needham

Owner: Amazon

IMDb (Internet Movie Database) is an online database of information related to films, television programs, home videos, video games, and streaming content online – including cast, production crew and personal biographies, plot summaries, trivia, ratings, and fan and critical reviews.

IMDb offers a rating scale that allows users to rate films on a scale of one to ten. It has been alleged that the rating system is flawed, for several reasons.
